

The Dog Pollution Solution Dog Glove Dispenser & Waste Bags

The Dog Glove™ Dispenser can now be seen in hundreds of parks all over Britain. This revolutionary new system leaves no excuses for irresponsible dog owners to not pick up after their dogs. Simple to install, simple to use, thick two ply bags have made these dispensers an essential tool in the fight against dog pollution.

The unique design of the dispenser allows only one bag at a time to be pulled out preventing any wastage problems. Constructed from rust resistant Zintec steel the dispenser is weather proof and vandal resistant. The locking front access permits easy filling. It is simple to mount on a post, wall, building or dog bin.

Specifications:

- Dispenser size: 460mm x 160mm x 230mm
- Colour Green: (Other colours by arrangement, minimum quantities apply)
- Dog Gloves (waste bags): cases of 800
- Various brackets are available for fixing, including walls, posts & banding

Maintenance

A Simple locking front allows easy access for refilling. Each dispenser carries 200-300 bags, installed in seconds by simply placing the holes on the header card over the pegs inside.

Dog Waste Bags

The Specially designed bags are made extra thick with a two ply pouch ensuring that you do not become over familiar with the poop. Simply place the bag on like a glove and pick up the poop, peeling the bag back from the wrist actually seals the poop in without any mess or fuss unlike, traditional pooper scoopers.
